

We have more than 20 years experience in the automotive glass industry and our premises are located in the 6th of October City. Striving to come out with the best product in the Arab & African region & a strong competitor to the European product, we have set the following elements to be the fundamentals of our performance:

1-Constantly relying on advanced technology & following the latest scientific methods ever since we started.

2-Utilizing the latest furnaces, machines & equipments from well known foreign suppliers and at any cost

3-Making sure that the materials used in production are for automotive use with high quality & are complying with the international standards.

4-Inside the factory, we have several workshops that are dedicated to the manufacturing of the tools & equipments needed to support the production process.

5-Relying on well trained & qualified workforce while continuously developing their experience through training & practice on the hands of experts & consultants in different fields of production & quality.

6-Strictly follow the comprehensive quality system while depending on credited testing instruments from global institutions in order to achieve highest quality levels.

7-Keep up with the scientific breakthroughs in the automotive glass industry through attending local & international exhibitions. In addition, following up on the latest innovations in the field & trying to apply them through the continuous upgrade of our production lines & maximizing their production capacity.

8-Maintaining an everlasting professional business relationship with our customers & suppliers in order to achieve optimal benefits for all parties.
